WE UNDERSTAND *GRAFFITI*

REMOVAL

GRAFFITI REMOVAL

ALPOLIC® HAS TEAMED WITH VALSPAR® AND GRAFFITI REMOVAL SERVICES® (GRS) TO PROVIDE A COST-EFFECTIVE SOLUTION FOR ASTM-COMPLIANT ANTI-GRAFFITI ACM THAT REQUIRES NO ADDITIONAL COATINGS AND NO ADDITIONAL COST. WITH THE SURGE IN GRAFFITI AND ITS SERIOUS CUMULATIVE EFFECT, ANTI-GRAFFITI COATINGS ARE BEING RAPIDLY ADOPTED IN SPECIFICATIONS AND, IN SOME CASES, REQUIRED BY LAW.

Every year American cities spend an estimated 12 billion dollars on graffiti removal, often using non-environmentally friendly, time-consuming, ineffective methods. Cities are passing regulations that dictate how quickly graffiti needs to be removed, citing rapid removal as an effective prevention tool.

This non-toxic, water-soluble, biodegradable cleaning system is highly effective and “brush-on/wipe-off” easy to use. It’s tested to ASTM standards and works equally on all new and existing ALPOLIC® Valspar® ACM projects.

Resistance

Get impressive graffiti resistance with no added costs for specialty coatings such as sacrificial clear or third coats. You can trust ALPOLIC® for a more cost-effective way to protect your building against graffiti. Any building old or new that boasts ALPOLIC® ACM with a Valspar® FEVE, PVDF or polyester finish is already graffiti-resistant at absolutely no extra cost, with no extra coatings.

Removal

ALPOLIC® has aligned with Valspar® and Graffiti Removal Services (GRS), a leading expert in the field of graffiti removal, to provide speedy, safe and accurate removal from a trusted graffiti-removal expert. GRS has been successfully eliminating graffiti for more than 15 years, with an expert team that works with everyone in the value chain to quickly outline approved products, techniques and procedures to remove graffiti from all building surfaces.

Cost-effective

ALPOLIC® graffiti resistance is built right into our products, with no expensive add-ons required.

Let's get started
