Two Color panel technology was first introduced into the market by ALPOLIC®. This unique application of applying a based coat of one color and then a second stripe combines the advanced coating system at ALPOLIC® with the look desired by the designer or architect.

These unique Two Color panel systems are created by combining FEVE technology with our advanced proprietary coil coating system. The second coat can be applied in virtually any width and placement desired. Our stock two color panels come standard with a traditional polyethylene core.

</table>
| Thickness | 3mm: ± 0.008” (0.2mm)  
4mm: ± 0.008” (0.2mm)  
6mm: ± 0.012” (0.3mm) |
| Bow       | maximum 0.5% of length and/or width |
| Squareness| maximum 0.2” (5mm) |

ALPOLIC® material is trimmed and squared with cut edges to offer the best panel edge conditions in the industry.

**FIRE PERFORMANCE**

Standard ALPOLIC® Two Color panels with a polyethylene core have been tested by independent testing laboratories using nationally recognized tests. This material meets all requirements of the International Building Code for combustible construction:

- IBC Listed for all .020/.020 products
- UL Listed

Please visit www.alpolic-northamerica.com or call technical support for complete report listings and additional information.

**WARRANTY**

Standard panel warranty: 10 Year
Finish warranty: 3mm 10 Year  
4mm 20 Year

Call ALPOLIC® Customer Service for exclusions and warranty details.

**PRODUCT NOTES**

- Panels should be stored flat in a dry, indoor environment.
- Fabricate panels at temperatures above 55°F.
- Protective film should be removed from panels soon after installation.
- Please refer to ALPOLIC® Painted ACM Fabrication Manual for routing and fabrication recommendations.
- Crating fees apply to orders for less than standard piece crate.
