## **Policy on Use of Polyethylene Core ALPOLIC**

To answer the question “What is the appropriate use for polyethylene (PE) core MCM, MCCA follows these guidelines:

- 1) In no case, should ALPOLIC PE core be used in a way that violates applicable building codes and requirements.
- 2) In no case should ALPOLIC PE core be installed over 40 foot from grade.

If a project is determined to have used ALPOLIC MCM inappropriately, we will, as a company, take steps to inform the appropriate parties.
